

SENIOR-LED. FULL-LIFECYCLE DELIVERY.

Clear ownership. From strategy through delivery.

One Cloud builds custom applications, connects systems, and modernizes digital platforms around operational objectives. Our senior team brings more than 20 years of delivery experience across web platforms, applications, and integrations.

CORE CAPABILITIES

Applications & portals

Custom software, user experiences, booking engines, and operational tools shaped around real workflows.

Systems integration

APIs, connected data, and third-party integrations that bring existing platforms and new applications together.

Platform modernization

Technical assessment, architecture, content platforms, consolidation, and migration planning.

Hosting & ongoing support

Hosting, maintenance, and continued development to support the solution beyond launch.

ONE CLOUD LEADS THE ENGAGEMENT

Strategy → Design → Development → Testing

Hosting and ongoing support complete the delivery lifecycle.

Established agency, specialist, and staffing relationships add expertise and capacity when needed. One Cloud retains responsibility for delivery, with roles and commitments defined for each engagement.

Requirements, milestones, testing, client review, and support planning connect the work from initial scope to operation.

RELEVANT CLIENT EXPERIENCE

Led from strategy through ongoing support.

One Cloud led strategy, design, development, testing, hosting, and ongoing support for the client engagements below.

Harvard Pilgrim

Web platform consolidation around a common Drupal foundation, with a staged approach to migration.

UMass Boston

An interactive research platform for searching, filtering, and exploring historical material, with content administration tools.

Paradise Beach Cozumel

A custom booking engine and business operations software built around hospitality workflows.

Some engagement details are confidential. Contact us to discuss relevance to your requirements and what additional information we can share.
